Ugg boots. Aussie memorabilia gifts, winter season sheepskin boots, trendy Aussie sheepskin boots. Refer to them as what you will, they're the style accessory you won't ever mature out of, that you will wear in excess of your reliable washed out denims, and that also your feet will adore you for.

So what are ugg boots, and why are they becoming very popular around the globe? Just in case you are living under a rock and don't have a pair, this is a quick history of the Australian style trend that is ugg boots.

The actual history of precisely how these kinds of Australian winter sheepskin footwear came to exist is lost within the mists of time. What is known is that they have been worn by Aussies since European settlers initial arrived on the huge island continent and learned that their chilly feet could best be warmed by sheepskin footwear. Whomever the first person was to don a pair, he or she started an Aussie style trend that would be constantly enduring.

Aussies really like the out of doors way of life, and Australian surfers and seaside lovers have been putting on winter sheepskin footwear for in excess of 50 years on the beach front, as a method of keeping their feet warm whilst out of the water.

The brand uggs comes from that famous Aussie tradition of adoringly abbreviating every popular usage term, and it was only a quick skip from "ugly boots" to seriously "ugg boots". Ugly since they were perceived at the time compared to more traditional shoes, there is no beating these Australian uggs boots for heat and luxury.

Till recent times, Australian ugg boots, or "Australian uggs" since they're occasionally endearingly described, were one of the world's best kept secrets, used by those in the know down under. The way the rest of the world began getting in the loop is almost disputed, but one of the most typically held beliefs is that they were popularised by Baywatch star, Pamela Anderson, when she kept her toes warm on set by putting on some Australian uggs. After that, tens of thousands of people around the globe have purchased pairs of uggs, whether it is as Aussie memento gifts, fashion statement, or most often, for their genuine comfort and enjoyment.

Whether or not ugg boots will become as synonymous with the Australian way of life and tradition as other Aussie symbols like the kangaroo, the didgeridoo and Vegemite sandwiches is yet to be seen, but the one thing is for sure, this really is one Australian way of life accessory that the rest of the planet is supporting as much as Aussies do.
